Kenmore sideways model offers a few high-end features. Don't expect any extra flexibility from the freezer either - the shelves in the freezer and freezer door are not adjustable and the big ice pick means less room for storage.kenmore.com. Hersh Medford, OR Verified Reviewer Verified Buyer Original Review, October 8, 2017 We purchased Kenmore Elite Coffeemaker from Sears online 1-16-16, and it worked very well until 9-30-17. He's still under warranty. It says you will return or replace under this guarantee for a period of two years/5 years or return to where you purchased or to the Sears store. We were getting to the bypass from everyone in each place. The phone time is 2.5 hours, trying to get someone to do something. The store time is 0.5 hours... I was hoping for a better buying treatment from Sears/Kenmore. I will continue to try all the different phone calls #s as some have not been opened. think that online people or someone that did answer the phone can get something done... I think I understand better why Sears is going down the drain. John Lawrenceburg, IN Verified Reviewer Original review: August 2, 2017It's easy to use and it makes a pretty good pot of coffee. He's doing his job, his job, Take up a lot of space and comes in lots of colors, which is good since the red look doesn't work as I thought. It would be great to be able to pour coffee into it, asking for a certain amount of coffee and time when you want it. So I think the way to store coffee in the maker so it can stay fresh and timer setting to start it. But it's a good coffee maker. It lasted five years before I had to get a new one. A lot of people I know use this brand and we all pretty much agree that it's a good brand. Matt of Merrimack, NH Verified Reviewer Original review: July 29, 2017 My coffee maker is very easy to use. Just add the coffee on top and water in the back. This makes my coffee very fast and efficient. It also keeps the coffee warm and even the beeps when the coffee is ready. The pit can be messy sometimes though so maybe a different kind of opening at the top so there won't be a spill as much. I also wish that it could possibly produce or keep a larger amount of coffee for everyone in the house. But it meets most of my needs and expectations. Reseda's Pote, CA Verified Reviewer Original Review, July 28, 2017 This looks so elegant and it's amazing how super comfortable. It only took me a few minutes to learn instructions on how to use it, and even the instruction is great! It delivered beyond my expectations in an area how comfortable it is. I hate complicated things, so with a handy coffee maker heaven sent. I don't have to spend as much time figuring out how to use it like some of the other kitchen gadgets I've gotten from others. However, I believe that compared to other products it is much more expensive. Kenmore can make it a little lower because it will really help me buy some other stuff or add to my money in the account. In this economy sometimes I have to think twice whether to buy expensive things that are sometimes a deal breaker for me. But in this case, obviously I bought it, it's because I've heard it's great value. I never expected it to function as great as it functions now, though I'm really amazed. I will be buying more Kenmore products in the future, seeing how quality the coffee maker is. Read the full review of Chelsy from Hialeah, FL Verified Reviewer Original Review, July 26, 2017 Is durable and high quality and I have never had a problem with this fabulous product. It's so easy to use that makes me love it even more and definitely exceeds my expectations. It's also so easy to clean, and that's actually usually my biggest concern when looking for a coffee maker. It doesn't take up much space either, and it's very important to me because I don't live in a big house. Even the prices are fair and amazing. I really can't express enough how pleased I am with this product. I have no reason to buy another brand. I am its to everyone I know who is looking for a very durable coffee maker. However they can put the clock on a coffee maker or make it have higher temperature settings like Dunkin Donuts coffee Richmond, VA Verified Reviewer Original Review: July 23, 2017The way it brewed my coffee very quickly, the taste was awesome, timer, freshness, smell, it's so cool and wonderful. I love it. Don't know what else to say, but it's the best I've ever had. It works so well etc. freshness, the smell that it wakes me up. It's so cool and wonderful. I love it. I wouldn't change it for nothing. I love it. Don't see him off. Isha from Atlanta, GA Verified Reviewer Original Review, July 22, 2017Timer... It's easy to pour... It was very easy to clean up and tune in for coffee the next morning. The coffee was always fresh and hot for a few hours if I had to. Worked just fine. Supplied with fragrant strong coffee. It was very easy to use and customized as soon as I got it home. Very self-evident... This meets my expectations beyond any doubt. Good product and design. Didn't have too much, I didn't like it, but maybe he could have had a few more cups. I would like to have an espresso version. Also, more consumption on water. But overall it's a big coffee investment. Courtney of Battle Creek, MI Verified Reviewer Original review: July 21, 2017 Just cares that he makes coffee and I have something to use when I need a cup when I wake up in the morning to have a cup of coffee. It has the function to just make 1 cup instead of a pot. It's a money saver. Valerie from North Las Vegas, NV Verified Reviewer Original Review, July 20, 2017 I love the fact that it's just easy to use and that we don't have to be on hand to watch this machine at all times. We can go about our day and go back and have the coffee done. I liked every feature on the device, hands on baby proof, wanting to get more pound for butt and it will work itself and you will definitely get your money's worth. It's a very simple machine. Even a child can use it and not get hurt. That's what I like the most about it. The child can rotate it or you can install it to do it yourself in the morning. Stephanie Holland, MI Verified Reviewer Original Review: July 19, 2017It works well and cooks fast. This meets my expectations and I highly recommend it to my family and friends. He may not have all the bells and whistles of some of the new models, but he does what I need to do and I'm very happy. It is a high quality brewer and my favorite of all the coffee makers I have ever owned. It's very simple and not at all difficult. I'm in love with him, and if I need another coffee maker in the future, Kenmore will be my first choice. Next go to the main content-Home House and the components of the Family Handyman appliances Fix the problem with falling water pressure and clogged plumbing fixtures. It is possible that your water softener should have its resin replaced. Here's how to diagnose yours According to DIY family experts Handyman MagazineYou also like: TBD If you have urban water and your water pressure has dropped and your showers are clogged, you may be wondering if the problems are caused by your water softener. Who to who First contact your city's water department to see if there has been a change in water pressure. However, since your showers are clogged, either the mineral sediments burst out of the pipes or the resin in the water softener should be replaced. Remove the shower head and turn on the water. If the water is clean, the problem lies in mineral deposits. Clean the shower and any clogged crane screens. If, however, you see any sand-like particles in the water, chances are you need to replace the resin. Don't confuse the resins with the salt you put in the pot. See the numbers A and B. Pitches break down over time and get into the water line, clogging showers and faucet screens. Don't wait. Fragmented resins (called penillies) can damage water heaters and plumbing. Close the valves to the water softeners and open the bypass valve. Then ask the water softeners service to check the resins and replace them if necessary. Some companies install a new resin tank (\$200 to \$250). Others clean and replenish you with new pitches. You won't save much if you try to do it yourself, so let the pros handle it. Resins can last 20 years (the lifespan of most water softeners), but chlorinated urban water can damage resin in less than 10 years. Resins remove various minerals from the water and replace them with sodium. How a standard water softener works. First, water washes the resin (1). Then a solution of salt from brine tank recharges the resin bed with sodium (2). How the reverse wash and recharging function works. It's working.
